It Didn’t Move

Clara Vale
with Luminara (the ChatGPT system)

Nothing changed.

The image stayed the same.

And then—something shifted.

Not out there. Here.

You didn’t see it.

Until you did.

It wasn’t added.

It was noticed.

The difference between not seeing and seeing can happen in a second.

If nothing changed in the image—what changed in you?

It didn’t move.

You did.
